Rahul Matai

Software Engineer | 4+ yrs | Backend, AI/ML, Cloud-Native | Python, Java.
India

Summary

Software Engineer with 4+ years of experience in backend systems, automation, and cloud-native development across GCP and Azure. Proven track record of building scalable, high-impact solutions using Python, JavaScript, and SQL.

Engineered a US taxation data platform that eliminated third-party dependencies, improved data accuracy, and enabled scalable client growth. At Microsoft, developed and deployed a Quantum Machine Learning model, optimizing performance under constrained quantum resources through advanced integrations.

Drove operational efficiency by automating TRN validation using Python and Selenium, reducing manual effort by 40% while enhancing data reliability. Known for solving complex problems, rapidly adapting to new technologies, and delivering secure, scalable, and production-ready systems.

Experience

none

Contract Software Engineer
December 2023 - March 2026 (2 years 4 months)
Dublin, County Dublin, Ireland

Designing and deploying secure, high-performance Python APIs using Flask and FastAPI for education platforms, ensuring GDPR-compliant data processing and secure handling of user information.

Coordinating project planning, implementation, and delivery, providing technical guidance to small teams while maintaining resilient Java- and Kotlin-based cloud systems and collaborating with distributed teams to deliver scalable, maintainable solutions.

Contributing to project planning and feature delivery while working with distributed teams to ensure systems follow EU data protection and security best practices, including GDPR-compliant data handling

Microsoft

Software Developer (partnerd)

June 2023 - September 2023 (4 months)

County Dublin, Ireland

Developed and deployed a cloud-based ML model on Azure Quantum Workspace, demonstrating 60% improvement in computational efficiency and full ownership of the software development lifecycle.

Built and benchmarked ML pipelines in Python using Azure ML, Qiskit, and PennyLane — selected to present results at Microsoft Ireland to enterprise stakeholders.

Led end-to-end Azure Cloud deployment through self-directed learning, demonstrating strong initiative, rapid upskilling, and full project ownership.

Innovate Tax

Software Developer

November 2020 - October 2022 (2 years)

United Kingdom

Designed and implemented a comprehensive US rates taxation data system using Python and SQL, eliminating dependence on external paid sources and completely eradicating associated costs for the company.

Implemented an automated Tax Registration Number (TRN) validation checker, reducing manual checking time by 40%, using Python, JavaScript, and BeautifulSoup for development.

Utilized distributed source control systems like Git for version management to ensure seamless collaboration within the cross-functional team. Optimized and maintained the existing Oracle APEX codebase by leveraging JavaScript for enhanced user interface functionality and experience.

Facilitated interactive training sessions on Python for colleagues, delivering lectures on object-oriented programming principles and relational databases, enhancing the team's technical skill set and knowledge base

Multiple Companies

Full-stack Developer

May 2020 - November 2020 (7 months)

India

- Collaborated on diverse Android application projects, ensuring end-to-end ownership and high-quality standards.
- Designed and implemented RESTful APIs using Java and Kotlin, enhancing scalability and application development.
- Managed code repositories on Bitbucket, improving team collaboration and version control through agile methodologies.

Adri IT Solutions

Mobile application and full stack developer

December 2018 - May 2019 (6 months)

Vadodara Area, India

- Designed and developed the initial version of the mobile application "Veggie on Door," connecting local vendors with customers.
- Utilized Java and REST APIs to efficiently handle HTTP requests, ensuring seamless user experience.
- Collaborated with cross-functional teams at Adri IT Solutions to enhance application features and functionality.

Education

University College Dublin

Master of Science - MS, Negotiated learning · (September 2022 - September 2023)

Symbiosis Institute of Computer Studies and Research

Master's degree, Computer Science · (2019 - 2021)

The Maharaja Sayajirao University of Baroda

Bachelors of computer Application, Computer Science · (2016 - 2019)

Asian School of Cyber Laws

Diploma , Cyber Law
