PROFESSIONAL SUMMARY

Software Engineer with 4+ years of experience specializing in backend systems, scalable APIs, and cloud-native development. Proficient in Java, Python, and C++ with strong expertise in distributed systems, CI/CD pipelines, and RESTful API design across Linux and Windows environments. Known for rapid learning, cross-functional collaboration, and delivering secure, maintainable, GDPR-compliant solutions for enterprise and education clients.

SKILLS

Programming Languages: Java, Python, JavaScript, C++, Kotlin

Frameworks & Libraries: Flask, FastAPI, Angular, React, GraphQL, Unit Testing, BeautifulSoup

Databases: MySQL, PostgreSQL, MongoDB, Firebase, Oracle APEX, SQL

Cloud & DevOps: AWS EC2, Google Cloud, Microsoft Azure, Apache Kafka, Git, Bitbucket, CI/CD

Soft Skills: Leadership, Problem Solving, Cross-Functional Collaboration, Quick Learning

PROFESSIONAL EXPERIENCE

Software Developer (Contract) Aug 2024 – Feb 2026

Independent Consultant | Dublin, Ireland

- Designed and deployed secure, high-performance RESTful APIs using Flask and FastAPI for education platforms, ensuring GDPR-compliant data processing and robust handling of sensitive user information.
- Provided end-to-end technical leadership — from architecture decisions and project planning through to delivery — collaborating with distributed teams across multiple time zones.
- Built and maintained resilient Java- and Kotlin-based cloud systems, applying EU data protection standards and security best practices throughout the full software development lifecycle.
- Improved CI/CD pipelines and code quality through automated testing and consistent code review practices, reducing production incidents by an estimated 30%.

Software Engineer Intern Jun 2023 – Sep 2023

Microsoft | Dublin, Ireland

- Developed and deployed a cloud-based ML model on Azure Quantum Workspace, demonstrating 60% improvement in computational efficiency and full ownership of the software development lifecycle.
- Built and benchmarked ML pipelines in Python using Azure ML, Qiskit, and PennyLane — selected to present results at Microsoft Ireland to enterprise stakeholders.
- Led end-to-end Azure Cloud deployment through self-directed learning, demonstrating strong initiative, rapid upskilling, and full project ownership.

Software Engineer Nov 2020 – Nov 2022

Innovate Tax | Vadodara, India

- Designed and implemented a US taxation data system using Python and SQL, eliminating dependency on paid third-party data sources and reducing associated operational costs to zero.
- Led end-to-end development of an automated TRN validation system using Python, JavaScript, and BeautifulSoup, cutting manual workload by 40% and establishing a scalable foundation for future compliance tooling.
- Optimized the Oracle APEX codebase with JavaScript enhancements, improving UI responsiveness and user experience for internal tax management workflows.
- Introduced Git-based version control practices across the team, streamlining cross-team collaboration and eliminating recurring integration conflicts.

Software Developer (Freelance) May 2020 – Nov 2020

Self-Employed | Pune, India

- Collaborated on diverse Android application projects, ensuring end-to-end ownership and high-quality standards.
- Designed and implemented RESTful APIs using Java and Kotlin, enhancing scalability and application development.
- Managed code repositories on Bitbucket, improving team collaboration and version control through agile methodologies.

Software Engineer Intern Nov 2019 – May 2020

Adri IT Solutions | Vadodara, India

- Designed and developed the initial version of the mobile application “Veggie on Door,” connecting local vendors with customers.
- Utilized Java and REST APIs to efficiently handle HTTP requests, ensuring a seamless user experience.
- Collaborated with cross-functional teams at Adri IT Solutions to enhance application features and functionality.

PROJECTS

Calorie-AI 2024 -Ongoing

Python · FastAPI · Anthropic Claude API · REST API Design

- Built a cross-platform calorie tracking application with a modular backend architecture (data, model, service, and UI layers), integrating LLM APIs for intelligent dietary insights and persistent JSON-based user profiling.

AI Attendance Mar 2020 – Mar 2021

Python · Computer Vision · Cloud · OS-independent Deployment

- Developed a cloud-based attendance system, eliminating hardware dependency and delivering a high-accuracy, OS-independent solution with minimal user interaction and seamless cloud installation.

Appoint & Stulyfe — Android Apps May 2020 – Nov 2020

Java · Android · MongoDB · Firebase · Google Cloud · AWS EC2

- Led Android development for two client-facing applications: a services platform (Appoint) with scalable MongoDB architecture and an online education app (Stulyfe) with Firebase real-time database and Google Cloud hosting.

EDUCATION

Master of Science in Computer Science Sep 2022 – Sep 2023

University College Dublin | Dublin, Ireland
